

HEADACHE DEVICES FOR VETERANS & CIVILIANS

OVER HALF of veterans
& **30%** of civilians
have severe headache

Using FDA-cleared devices, veterans reported, 2 hours after treatment

73% Reduced pain level

50% Disappearance of at least one associated symptom

33% Reaching full functioning level

Meanwhile, civilians face access challenges.

Some private health plans claim the FDA-cleared devices are “investigational” and refuse to cover them.
